SUMMARY

Computer Science undergraduate at VIT Bhopal (CGPA: 8.39) with experience in Java, Spring Boot, SQL, REST APIs, and full-stack development. Built applications using Google Gemini AI, Firebase, Spring Boot, and React, including a real-time AI interview platform and a Spring Boot backend with JDBC-based MySQL integration.

EDUCATION

Vellore Institute of Technology

B.Tech – Computer Science and Engineering | CGPA: 8.39

Bhopal, Madhya Pradesh

2023 – 2027

EXPERIENCE

Software Developer Intern

May 2026 – Jun 2026

TechCiti Consultancy Limited

- Implemented and maintained 8+ backend modules using Java, Servlets, and JSP to handle business logic and client requests for a web-based application.
- Integrated backend components with a MySQL database using JDBC, writing SQL queries for CRUD operations and validating data before storage.
- Resolved 15+ functional and UI defects identified during testing, improving application stability before deployment.
- Coordinated with a team of 4–6 developers on sprint planning and feature delivery throughout the internship.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Backend Technologies: Spring Boot, REST APIs, JPA, Maven, JDBC, Gradle

Cloud & AI: AWS (EC2, S3, Lambda, RDS, IAM), Firebase, Codex, Antigravity

Core Subjects: OOPs, DBMS

Developer Tools: Git, GitHub, Agile

Database: MySQL, MongoDB

PROJECTS

AI Mock Interview Platform (InterPrep) | Next.js, TypeScript, Gemini AI, Firebase | [Link](#)

Jan 2026

- Designed an AI-powered interview engine using Google Gemini API with custom prompt engineering to generate role-specific technical questions, significantly reducing manual preparation time for users.
- Built a secure full-stack system using Next.js 15 and Firebase, supporting high-concurrency sessions with sub-second latency for authentication and Firestore data retrieval.
- Migrated frontend to TypeScript and Tailwind CSS, achieving a 98/100 Google Lighthouse score with improved mobile responsiveness and faster page load times.
- Implemented real-time interview simulation with React Hooks and synchronized audio indicators, increasing session completion rates by 50%.

Hybrid Blockchain Voting System | React, Tailwind CSS, Spring Boot, QR/OTP Auth | [Link](#)

Oct 2025

- Built RESTful backend APIs using Java Spring Boot with Spring Security for QR-based dual-layer authentication, validating voter identity in under 2.5 seconds during local testing.
- Crafted 12+ localized UI components with Hindi/English support, reducing average time-to-vote for rural users by 30%.
- Delivered a real-time results dashboard with optimized state management, cutting data latency by 45% while handling high-frequency updates from the Spring Boot backend.
- Managed frontend-to-blockchain integration for a 6-member team, ensuring full transaction visibility during the Ethereum block-mining period.

3D Dungeon Puzzle Game | C#, Unity, Blender | [Link](#)

Jul 2025

- Engineered a 3D puzzle-adventure game in Unity (C#) featuring 3 handcrafted dungeon environments and 15+ interactive puzzles with player progression mechanics.
- Optimized asset loading and scene management, reducing average level loading time by 50% while maintaining smooth gameplay performance.
- Collaborated with a team of 4 developers using Git for version control, contributing to gameplay scripting, debugging, and feature integration.
- Conducted playtesting with 150+ users, incorporating feedback to improve puzzle balance, game flow, and overall player experience.
